i3 FURTHER STRENGTHENS ITS GLOBAL PRESENCE WITH ACQUISITION OF PACIFIC PHARMA PARTNERS PTE LTD.

*Asia-Pacific-Based Clinical Contract Research Organization to Complement
i3's Service Capabilities*

BASKING RIDGE, NJ August 4, 2006—Pharmaceutical services company i3, an Ingenix business, is announcing today its acquisition of Pacific Pharma Partners Pte Ltd. (Pacific), a pan-Asian clinical contract research organization (CRO) that provides outsourced clinical development services in Far Eastern markets. This addition to the i3 family strengthens i3 Research's presence in the Asian marketplace and will enrich i3's ability to meet growing customer demand for CRO services in the Far East.

Pacific is headquartered in Singapore, with additional operational presence in Taiwan and Hong Kong. It will be integrated into i3 Research and led by i3 Research President Nigel Page. Pacific's managing partner Robert Teoh, MD, FRCP, will assume the role of general manager, Asia Pacific, for i3 Research.

"This combination is truly a win-win for our customers," said Nigel Page. "With i3's access to a broad range of customers with known and emerging needs in the Asia Pacific region, and Pacific's expertise and knowledge of the region, our clients will have ready access to first-class delivery capability in this increasingly important region of the world for clinical research. Our combined strengths will represent a unique and powerful contract research asset to our global customers."

About i3

i3, a global Ingenix company, provides integrated scientific strategies and solutions throughout the pharmaceutical product lifecycle. It comprises: i3 Research, a therapeutically specialized contract research organization; i3 Statprobe, a leader in comprehensive data services; i3 Drug Safety, engaged in pharmacovigilance and epidemiology; i3 Pharma Resourcing, a world-class staffing partner; i3 Innovus (formerly i3 Magnifi), delivering the science and solutions to achieve marketplace success; and, i3 DLN, providing certified medical education. i3 helps companies gain sharper insights that lead to better patient care.
