

**The area of endocrinology and metabolic diseases is among the leading therapeutic categories for clinical drug development. It is a diverse area of research that ranges from widespread conditions such as diabetes and obesity to rarer illnesses, all of which demand specialized expertise. Accordingly, i3 Endocrinology and Metabolic Diseases employs a uniquely specialized approach to deliver scientific discipline, dedicated teams, and expertise at every level.**

### **Proven experience**

Our experience spans a broad range of services across this diverse therapeutic category. Our work ranges from niche studies in rare diseases to late phase studies in more than 6,000 patients. We have provided specialized services in endocrinology and metabolic diseases that include feasibility planning and protocol development, clinical monitoring, regulatory consulting, complete data management, and biostatistics—all on a global scale.

For example, i3 has completed, or is currently conducting, diabetes treatment projects in Austria, Canada, Czech Republic, Finland, France, Germany, South Africa, Spain, Greece, Israel, Italy, Belgium, Croatia, Denmark, Estonia, Hungary, Latvia, Lithuania, Netherlands, Poland, Portugal, Romania, Russia, Slovakia, Sweden, Switzerland, Turkey, Ukraine, United Kingdom, and the United States.

Indications include:

- Cardiovascular disease
- Cystic Fibrosis
- Diabetes (Type 1 and Type 2)
- Diabetic macular edema
- Diabetic neuropathy
- Diabetic retinopathy
- Gaucher's disease
- Hormone replacement therapy
- Hypercholesterolemia
- Hyperlipidemia
- In vitro fertilization
- Male and female contraception
- Menopause
- Metabolic syndrome
- Obesity
- Osteogenesis imperfecta
- Post-menopausal osteoporosis
- Precocious puberty
- Sexual dysfunction
  - Erectile dysfunction
  - Female sexual dysfunction
- Women's health

### **Strategic thinking, operational excellence**

Our specialized approach to endocrinology and metabolic diseases means we provide in-depth scientific insights and tailor our processes and teams to meet the demands of the project and the therapeutic category—maintaining speed, precision, and quality. Our therapeutic leads offer strategic thinking, but also stay involved in a high level of medical and scientific oversight throughout study execution.

Our medical staff includes several board certified endocrinologists and a doctoral-level dietitian. Our endocrinology expertise is amplified by the experience of our clinical staff, including project management, monitors, and medical monitors and advisors. Additionally, we have experience with specialized study design, including metabolic, body composition, and micro and macronutrient controlled diets.

The seamless integration of scientific, medical, and operations teams—combined with a unique eye on the therapeutic nuances—means every aspect of a study is more efficient and exact.

Find out what i3's specialized approach can do for your next project in endocrinology and metabolic diseases.
