**i3 STATPROBE RECEIVES 2010 LILLY GLOBAL SUPPLIER
AWARD**

Award is Given to Suppliers who Demonstrate Superior Performance

BASKING RIDGE, NJ, May 11, 2010—Life science services company i3 announced today that its i3 Statprobe business unit has received the 2010 Lilly Global Supplier Award in the *Supplier Award for Excellence* category. Nominations were submitted by Lilly management, identifying suppliers who demonstrate superior performance with winning behaviors key to Eli Lilly and Company’s success; this marked the 11th year that Lilly has bestowed these awards, which i3 received at a ceremony at Lilly’s Corporate Center in Indianapolis April 28, 2010.

“i3 has an unmatched commitment to quality, and this award shows that our customers value our approach,” said Gregg Dearhammer, President of i3 Statprobe. “We align our goals with those of our customers and foster a do-it-right-the-first-time culture to ensure reliability, on-time delivery, and a proactive approach to helping our customers improve productivity and reduce cost. Our customer feedback—as well as recognition such as this—shows that our approach works.”

About i3 Statprobe

i3 Statprobe provides clinical data services to pharmaceutical, biologic, medical device and diagnostics customers. It is a leader in the development and growth of functional alliances and strategic partnerships, which help enhance efficiencies and reduce costs in clinical trials.

About i3

i3 takes a 360-degree view of healthcare to help its global pharmaceutical, biotechnology, and medical device customers bring safe and effective products to market quickly and help demonstrate their value, leading to increased ROI and better patient care. i3’s integrated businesses combine a deep understanding of data and methodologies; therapeutic, scientific, and functional proficiency; and the expertise to help design research that demonstrates a product’s value, and helps achieve market access and assure reimbursement. More information about i3 can be obtained at www.i3global.com.
