i3 in Russia

Offering superior opportunities for patient recruitment and retention

Recent industry trends in patient recruitment are showing successful results in Russia and the neighbouring states of the former Soviet Union. Through a strategic acquisition of Lege Artis, i3 is strongly positioned to enhance access to pools of patients through its working knowledge and experience with investigators throughout the region.

Find out how i3's specialised approach and proven local resources throughout Russia can support your next project.

Research in Russia: Part of a smart global strategy

We encourage our customers to take a fresh look at the opportunities for clinical research Russia currently provides. This recommendation may prove most advantageous for small to midsize Western European and North American organisations which may have traditionally overlooked the substantial patient recruitment and retention possibilities offered by the region.

i3 is uniquely positioned to help you strategically utilise the considerable assets that are available across Russia, while minimising cultural differences and difficulties, on engagements ranging from new studies to rescue studies of any size or scope.

Right time, right place, right partner

Take advantage now of i3's breadth of capabilities and depth of local talent in Russia to:

- Experience high patient recruitment and retention rates
- Cut through bureaucratic red tape and eliminate obstacles to success
- Advance your research in key indications that include:
 - Hepatitis
 - HIV/AIDS
 - Tuberculosis
 - Vaccines
 - Diabetes
 - Cancer
- Leverage proven experience since 2004 that includes:
 - Completing 68 trials involving myriad subjects and sites
 - Establishing a growing network of 517 investigators

About i3

i3's full-spectrum functional and therapeutic expertise helps pharmaceutical companies gain sharper insights that lead to better patient care. Faster and more efficiently. With less risk and expense. For solutions that combine consulting-firm flexibility with the scientific depth of an integrated research organisation, look to the specialists of i3.
