i3 SPAIN RANKS IN THE TOP TEN *BEST WORKPLACES SPAIN* FOR SECOND STRAIGHT YEAR

i3 France Ranks in Top 20 of France List

BASKING RIDGE, NJ, May 12, 2010—Life science services company i3 announced today that for the second straight year, its Spanish entity was named one of the top 10 places to work in Spain among companies of 100 to 250 employees. The *2010 Best Workplaces Spain* award from Great Place to Work[®] Institute Spain was awarded to i3 during a ceremony May 11, 2010 in Madrid.

“At i3, we focus on maintaining a happy and fulfilling workplace for our employees as a key indicator of the performance we deliver for our clients,” said Anna Gibernau, managing director for i3 in Spain. “We understand that engaged employees are the most important factor in our ability to delight clients with quality, service and value.”

The Great Place to Work[®] Institute seeks to help companies from all sectors implement constant improvements in their working environments, which can result in measurable benefits to their businesses. Companies are selected for the Best Workplaces lists primarily on the basis of their employees' responses to the Great Place to Work[®] Trust Index[®], the Institute's proprietary employee survey. The Institute describes a great place to work as one in which employees “trust the people you work for, have pride in what you do, and enjoy the people you work with.”

i3 France was ranked number 11 in the *2010 Best Workplaces France* list, also compiled by the Great Place to Work Institute, the second time it has appeared on the list of companies in France in three years.

“Around the globe we have the best and brightest employees, and they are the reason for i3's success,” said Glenn Bilawsky, i3 CEO. “Our highly experienced staff has earned the respect of our customers and investigative sites because of their professionalism and deep knowledge of our therapeutic areas and the clinical trial process as a whole. That feeling of respect and accomplishment adds to the employees' job satisfaction, and i3 certainly is proud of that.”

Since 2003 an annual list of 100 Best Workplaces in 15 European countries has been identified and published in leading national European magazines and newspapers. Each year, the Great Place to Work[®] Institute also produces various *Best Companies to Work For* lists in the U.S., including Fortune's *100 Best Companies to Work For[®] in America*.

About i3

i3 takes a 360-degree view of healthcare to help its global pharmaceutical, biotechnology, and medical device customers bring safe and effective products to market quickly and help demonstrate their value, leading to increased ROI and better patient care. i3's integrated businesses combine a deep understanding of data and methodologies; therapeutic, scientific, and functional proficiency; and the expertise to help design research that demonstrates a product's value, and helps achieve market access and assure reimbursement. More information about i3 can be obtained at www.i3global.com.
