

KnowledgePort®

i3 Statprobe's secure Web portal, KnowledgePort®, provides clients with ongoing access to clinical trial data from any Internet-connected computer. Building on i3 Statprobe's Oracle® Clinical infrastructure, this user-friendly tool allows clients to view timely, streamlined, scanned clinical research forms (CRFs), data sets, enrollment status, safety information, and a full range of data management reports in the most cost-effective way.

Easy access to clinical trial data at every stage

At every stage, sponsors can access clinical trial data with minimal effort. You can view CRFs, CRF and query status reports, data listings, safety information, and other data management reports. Choose from our suite of standard reports or we'll create custom reports better suited to your project and your partners.

Diverse and detailed study information

KnowledgePort places detailed study information at your fingertips, including:

- SAS data sets
- Summary reports
- Data entry progress
- Queries
- Resolutions
- Scanned CRFs
- Safety information
- Custom reports

KnowledgePort provides:

- 24/7 availability of current study information
- Near-real time access to data for making faster, better-informed decisions
- Intuitive, user-friendly interface—no software training needed
- Standard Web access—no expensive software to install
- Dependable 128-bit, SSL security

Find out how i3 Statprobe's secure Web portal, KnowledgePort, and other integrated technologies can assist in your next project.
