

Donnie P. Funch has been with the epidemiology group since 1987 after having earned a master's degree in Epidemiology and a doctoral degree in Medical Sociology from the State University of New York (SUNY) at Buffalo. Before joining i3 Drug Safety, she conducted studies in oncology, chronic pain, and health behavior. Dr. Funch has considerable experience in the design, conduct, analysis, and reporting of epidemiologic studies, and has written or co-authored more than 25 peer-reviewed articles. At i3 Drug Safety, she has managed case-control studies in the areas of puerperal strokes and seizures, rheumatoid arthritis and post transplant lymphoproliferative disorder and a randomized trial of douching and pelvic inflammatory disease. She has also conducted two device studies involving heart valves and cellular telephones and a study of the health effects of environmental exposure to electric and magnetic fields and direct current.
