

**Florence T. Wang** joined i3 Drug Safety in 2007. She received a Doctor of Science degree in Epidemiology and Environmental Health in 2005 and a Master of Science degree in Epidemiology in 2001 from the Harvard School of Public Health. Her previous research focused on determinants of heavy metal burden, and environmental and genetic risk factors of cognitive decline, hearing loss, and other health outcomes related to aging. Prior to joining the epidemiology group, she was a post-doctoral fellow in the Department of Environmental Health at the Harvard School of Public Health. Her work at i3 Drug Safety has been in the areas of vaccines and developmental disorders.
