

Najat J. Ziyadeh joined i3 Drug Safety in 2001. She earned both her Master of Arts in Medical Science and Master of Public Health in Epidemiology and Biostatistics from Boston University in 2001. Prior to joining the epidemiology group, she conducted clinical research on the effects of angiogenesis inhibitors on human tumor growth and metastasis, chronic obstructive pulmonary disease and described the smoking, drinking and dieting behaviors of adolescents based on sexual orientation. Ms. Ziyadeh has extensive experience in the analysis and reporting of large-scale postmarketing safety research studies for the pharmaceutical industry using a variety of health insurance claims databases. Her work at i3 Drug Safety has been in the areas of diabetes, cardiovascular disease, female health and antibiotic use.
